

To Our Valued Patients,

We know that in the past months, times have changed. We are doing everything possible to ensure your health and safety at WDG. We have updated our policies to reflect the current COVID-19 pandemic.

Here's what to expect at your next visit:

1. On your arrival for your dental visit, remain in your vehicle and we will text you to enter. Please wear a mask when you enter. We will also take your temperature with a forehead thermometer. You will not be sitting in the reception area or be in close proximity with other patients. We are staggering our appointments to avoid this situation. Only the patient will be allowed in the office, unless you are accompanying a child.

2. Please CONFIRM your appointment and ANSWER the supplemental health history questions prior to your arrival that day via our e-mail confirmation system and website. This is essential for everyone's health. We also ask that you arrive promptly and be prepared to stay for the scheduled length of the appointment.

3. Make sure we have the most current copy of your dental insurance as well as updates to any other personal information.

Winnetka Dental Group has been featured on WGN Medical Watch for our exceptional infection control procedures. We have made a significant investment in our air purification systems, PPE and additional time scheduled for your dental care. Please watch the segment on our website. We are extremely proud and honored to be featured as an innovative dental office for COVID 19 infection control!

It is important to keep up with your regular cleaning and examinations, as well as any other recommended dental procedures. This is a balancing act but remember, forgoing important doctor's visits can be costly to your overall health.

Sincerely,

Dr. Czarkowski and the dental team at the WDG
